

What will HOT lanes look like?

- Signs will let you know when you can enter the lane and how much it will cost. Toll rates vary depending on congestion.
- An automatic reader will deduct tolls as it registers a transponder. A light will flash when a vehicle's transponder is read.
- Dashed lines will indicate when you can enter or exit the HOT lane.
- Road striping and extra merging space between the HOT lane and other lanes will ensure safety.
- A thick double white line will separate the HOT lane from the other traffic. It is illegal to cross the double line.
